GOLDEN PEAKS RESOURCES LTD.
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED JANUARY 31, 2008
(Unaudited - Prepared by Management)

1. NATURE OF OPERATIONS

The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of precious metals on mineral properties located in Argentina. On the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the mineral properties and related deferred costs is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete development and upon future profitable production. The amounts shown as mineral properties and deferred exploration costs represent net costs to date, less amounts written off, and do not necessarily represent present or future values.

Management considers that the Company has adequate resources to maintain its core operations and planned exploration programs over the next twelve months. However, the Company recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

2. SIGNIFICANT ACCOUNTING POLICIES

The interim consolidated financial statements of the Company have been prepared by management in accordance with Canadian generally accepted accounting principles. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the interim financial statements and accompanying notes. Actual results could differ from those estimates. The interim consolidated financial statements have, in management's opinion, been properly prepared using careful judgement with reasonable limits of materiality. These interim consolidated financial statements should be read in conjunction with the most recent annual consolidated financial statements. The significant accounting policies follow that of the most recently reported annual financial statements.

3. CHANGES IN ACCOUNTING POLICIES

Effective May 1, 2007, the Company has adopted two new accounting standards related to financial instruments that were issued by the Canadian Institute of Chartered Accountants. These accounting policy changes were adopted on a prospective basis with no restatement of prior period financial statements. The new standards and accounting policy changes are as follows:

Financial Instruments - Recognition and Measurement (Section 3855)

In accordance with this new standard, the Company now classifies all financial instruments as either held-to-maturity, available-for-sale, held-for-trading, loans and receivables, or other financial liabilities. Financial assets held-to-maturity, loans and receivables and financial liabilities other than those held-for-trading are measured at amortized cost. Available-for-sale instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Instruments classified as held-for-trading are measured at fair value with unrealized gains and losses recognized on the statement of loss.

GOLDEN PEAKS RESOURCES LTD.
NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED JANUARY 31, 2008
(Unaudited - Prepared by Management)

3. CHANGES IN ACCOUNTING POLICIES (continued)

Upon adoption of this new standard, the Company has designated its cash and cash equivalents as held-for-trading, which are measured at fair value. Exploration advances and other receivables are classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

Comprehensive Income (Section 1530)

Comprehensive income is the change in shareholders' equity during a period from transactions and other events and circumstances from non-owner sources. In accordance with this new standard, the Company now reports a statement of comprehensive income and a new category, accumulated other comprehensive income, in the shareholders' equity section of the balance sheet. The components of this new category will include unrealized gains and losses on financial assets classified as available-for-sale.

As at January 31, 2008, the Company did not have any financial assets classified as available-for-sale and therefore the adoption of the standards noted above had no effect on the presentation of the Company's financial statements.
